Characteristics	Fantastic hot and cold scent throw. A softer wax, ideal for high end candles adhesion. Amazing clean burn aided by coconut oil. Smooth tops pre-burn, post-burn smoothness is fragrance dependant.	The only wax of its kind in the market. A harder wax with intended shrinkage properties designed for melts and moulds. Powerful hot scent throw plus a high tolerance to more potent oils. Perfect wax for hot or candle-adverse conditions.	A uniquely balanced, natural product with strong hot and cold scent throw. A one-pour wax that gives great smooth tops pre and post burn. An overall top performer, clean burn with fantastic adhesion	Unrivaled hot scent throw with fantastic container adhesion. With S100 it can sometimes prove difficult to achieve smooth tops consistently. Post burn appearance is fragrance dependant.	Blended with pure, ethically sourced beeswax. Smooth set after burning each time with A high fragrance tolerance (8-10%) and unbeatable container adhesion. Less frosting, with fantastic oil absorption for an amazing hot and cold scent throw.	This wax is a combination of the A05 Superior Soy wax & the MST Wax Additive. A one-pour-wax with perfect results and reset everytime. A game changer within the candle industry.	Devised for candle makers looking for a single pour wax with perfect reset. This wax additive has gone through many rigorous testing through it's development process by our local Australian Lab Leader Analytical.
Suggested Usages	<ul style="list-style-type: none"> • Ideal Container Candles • Works well with colour • Can be used in Melts in colder climates 	<ul style="list-style-type: none"> • Ideal for Melts, Pillars and Tarts • Suitable for Container candles in warmer climates • Works best with colour 	<ul style="list-style-type: none"> • Ideal for Container Candles • Best wax for glass adhesion • Great overall performer, suitable for most candle applications • Works well with colour 	<ul style="list-style-type: none"> • Ideal for Container Candles • Works well with colour 	<ul style="list-style-type: none"> • Ideal for Container Candles • Works well with colour • Suitable for Pillars and Melts 	<ul style="list-style-type: none"> • Ideal for Container Candles • Works well with colour • Best tops and finishes with a single pour 	<ul style="list-style-type: none"> • Additive that turns every wax into the perfect candle

* Value dependant on the potency of the fragrance so testing is required.

[^] Prolonged heating about 85°C can cause discolouration.

[#] Heating above 85°C for too long may cause the wax to discolour.
